

## ESSA PHARMA ANNOUNCES ABSTRACT PRESENTATION AT THE 2019 AMERICAN UROLOGICAL ASSOCIATION ANNUAL MEETING

**Houston, Texas and Vancouver, Canada, April 17, 2019** – ESSA Pharma Inc. (TSX-V: EPI; Nasdaq: EPIX), a pharmaceutical company focused on developing novel therapies for the treatment of prostate cancer, today announced an abstract on ESSA's aniten compounds for metastatic castration-resistant prostate cancer has been selected for a moderated poster presentation at the upcoming 2019 American Urological Association ("AUA") Annual Meeting from May 3-6 in Chicago, Illinois. ESSA's next generation anitens, inhibitors of the N-terminal domain of the androgen receptor ("AR"), represent a novel therapeutic strategy for castrate-resistant prostate cancer ("CRPC"). The moderated poster presentation will provide preclinical information on the class of next-generation anitens and will expand on the preclinical characterization of ESSA's recently declared IND candidate, EPI-7386.

**Abstract ID:** 19-1963  
**Abstract Title:** A new generation of N-terminal domain androgen receptor inhibitors in castration-resistant prostate cancer models  
**Presenter:** Ronan Le Moigne, PhD  
**Session:** MP34-04, Prostate Cancer, Advanced (including Drug Therapy) IV  
**Date:** Saturday May 4, 2019  
**Time:** 1:00 – 3:00pm Central Time  
**Location:** McCormick Place, Chicago, Illinois

### About ESSA Pharma Inc.

ESSA is a pharmaceutical company focused on developing novel and proprietary therapies for the treatment of castration-resistant prostate cancer ("CRPC") in patients whose disease is progressing despite treatment with current therapies. ESSA believes that its proprietary compounds can significantly expand the interval of time in which patients suffering from CRPC can benefit from hormone-based therapies, by disrupting the androgen receptor ("AR") signaling pathway that drives prostate cancer growth and by preventing AR transcriptional activity by binding selectively to the N-terminal domain ("NTD") of the AR. A functional NTD is essential for transactivation of the AR. In preclinical studies, blocking the NTD has demonstrated the capability to overcome the known AR-dependent mechanisms of CRPC. ESSA was founded in 2009.

ESSA proprietary compounds, otherwise known as aniten compounds, bind to the N-terminal domain of the androgen receptor.

### About Prostate Cancer

Prostate cancer is the second-most commonly diagnosed cancer among men and the fifth most common cause of male cancer death worldwide (Globocan, 2018). Adenocarcinoma of the prostate is dependent on androgen for tumor progression and depleting or blocking androgen action has been a mainstay of hormonal treatment for over six decades. Although tumors are often initially sensitive to medical or surgical therapies that decrease levels of testosterone, disease progression despite castrate levels of testosterone generally represents a transition to the lethal variant of the disease, metastatic CRPC ("mCRPC"), and most patients ultimately succumb to the illness. The treatment of mCRPC patients has evolved rapidly over the past five years. Despite these advances, additional treatment options are needed to improve clinical outcomes in patients, particularly those who fail existing treatments including abiraterone or enzalutamide, or those who have contraindications to receive those drugs. Over time, patients with mCRPC generally experience continued disease progression, worsening pain, leading to

substantial morbidity and limited survival rates. In both in vitro and in vivo animal studies, ESSA's novel approach to blocking the androgen pathway has been shown to be effective in blocking tumor growth when current therapies are no longer effective.

### **Forward-Looking Statement Disclaimer**

This release contains certain information which, as presented, constitutes "forward-looking information" within the meaning of the Private Securities Litigation Reform Act of 1995 and/or applicable Canadian securities laws. Forward-looking information involves statements that relate to future events and often addresses expected future business and financial performance, containing words such as "look forward", "anticipate" and, "believe", and statements that an action or event "is expected", "should", or "will" be taken or occur, or other similar expressions and includes, but is not limited to, statements regarding the anticipated pharmaceutical properties of the EPI-7386 drug candidate and anti-androgens, upcoming presentations at AACR, and beliefs about ESSA's proprietary compounds significantly expanding the interval of time in which patients suffering from CRPC can benefit from hormone-based therapies.

*Forward-looking statements and information are subject to various known and unknown risks and uncertainties, many of which are beyond the ability of ESSA to control or predict, and which may cause ESSA's actual results, performance or achievements to be materially different from those expressed or implied thereby. Such statements reflect ESSA's current views with respect to future events, are subject to risks and uncertainties and are necessarily based upon a number of estimates and assumptions that, while considered reasonable by ESSA as of the date of such statements, are inherently subject to significant medical, scientific, business, economic, competitive, political and social uncertainties and contingencies. In making forward-looking statements, ESSA may make various material assumptions, including but not limited to (i) the accuracy of ESSA's financial projections; (ii) obtaining positive results of clinical trials; (iii) obtaining necessary regulatory approvals; and (iv) general business, market and economic conditions.*

Forward-looking information is developed based on assumptions about such risks, uncertainties and other factors set out herein and in ESSA's Annual Report on Form 20-F dated December 13, 2018 under the heading "Risk Factors", a copy of which is available on ESSA's profile on the SEDAR website at [www.sedar.com](http://www.sedar.com) or ESSA's profile on EDGAR at [www.sec.gov](http://www.sec.gov), and as otherwise disclosed from time to time on ESSA's SEDAR and EDGAR profiles. Forward-looking statements are made based on management's beliefs, estimates and opinions on the date that statements are made and ESSA undertakes no obligation to update forward-looking statements if these beliefs, estimates and opinions or other circumstances should change, except as may be required by applicable Canadian and United States securities laws. Readers are cautioned against attributing undue certainty to forward-looking statements.
